Created: 2009-03-04
Updated: 2018-01-04

GENERAL INFORMATION

Attila 6120B is an acrylic foam tape with very good adhesion to low surface energy (LSE) materials, making it suitable for more demanding applications.

- 1,10mm thick
- Acrylic adhesive
- Temperature resistant up to 120°C
- Excellent for LSE-surfaces

Attila 6120B can be die-cut for custom made parts and is available in all dimensions but standard widths are:

- 9mm x 33m
- 12mm x 33m
- 19mm x 33m
- 25mm x 33m
- 50mm x 33m

CONSTRUCTION

APPLICATIONS

Attila 6120B is used for many kinds of bonding applications. Due to a high holding force power the tape can replace bonding solutions such as screws, rivets, nails and fluid adhesives. The Attila 6-series is suitable for bonding of difficult surfaces with low surface energy, for example powder coated substrates and some plastics.

USER GUIDELINES

To obtain optimal adhesion the surfaces must be clean and dry. Most frequent cleaning solvent is isopropyl/water (50:50 mixture) alcohol. Use safety instructions before using cleaners. Sometimes depending on surface a primer can be used to obtain a higher bonding force. Ideal temperature for tape application is between 21°C and 38°C. All Attila tapes require a dwell time of 72 hours for achieving 100% bonding strength.
